

DIFFERENCES BETWEEN

DATA AND APPLICATION SOLUTIONS

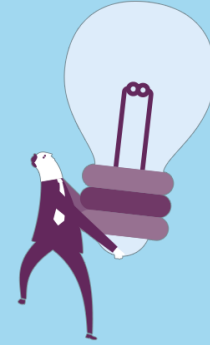

&

VERTICAL APPLICATION SOLUTIONS

Why the change?

Data and Application Solutions was created to be more buyer-friendly. However, it didn't quite bring in the contracts CCS hoped it would. It was reorganised following feedback from supplier engagement sessions, along with a new name - Vertical Application Solutions!

When does VAS open?

Vertical Application Solutions is expected to open to supplier applications on 20th June 2022. It will replace the original Data and Application Solutions framework.

What are the main differences?

The changes CCS has made to create this new framework make it more buyer-friendly, though a lot of the framework scope is the same.

Similar to Data and Application Solutions, Vertical Application Solutions will be available to all central government departments and their arm's length bodies, devolved administrations, the wider public sector, and third sector organisations.

DATA AND APPLICATION SOLUTIONS

Had 14 Lots covering the following 5 areas:

- Enterprise applications
- Local government
- Health and social care
- Police and emergency services
- Education

Maximum call off length of 5 years with an optional extension of up to 2 years.

A general focus on central government, but local gov had the biggest spend.

VERTICAL APPLICATION SOLUTIONS

Has 5 Lots covering:

- Business Applications
- Education, Community Health and Social Care solutions
- Housing, Environmental and Planning Solutions
- Citizen Services
- Blue light solutions

Flexible call off lengths to suit specific needs

A particular focus on blue light, education, local authority and social care sectors.
